

## 12/24V GA Pack

### Opis produktu

A tough, budget-priced, dual voltage aircraft start unit designed for the private operator and general aviation, it uses the same high-discharge batteries as other Powervamp packs.

- 2400 Peak amps
- Sealed lead acid AGM battery
- Cleared for air transportation
- External charger with LED status

- Tough polyethylene case
- 3 LED battery charge status
- USB socket for phone/tablet charging
- External 750A output fuse

A tough, budget-priced, dual voltage aircraft start unit designed for the private owner and general aviation operator. It uses the same high quality, high-discharge batteries as used in Powervamp's premium aviation product range. Ideal for smaller turbine aircraft and helicopter operators, all piston aircraft, or where the starting of 24V trucks and 12V vehicles is also a requirement.
