A1-G - Tactical Aviator Series Flashlight - Green LED

Opis produktu

The FLITELite.com A1-G: Tactical Aviator Series Light -Green LED

The A1-G with a Green LED is designed for the aviator and tactical operations where having a light be too BRIGHT is the issue. Pilots and other operators that demand light discipline will find the FLITELite.com flashlights a great solution. The light always starts in a programmable memory mode, which is user programmable to any brightness level desired. With one press the light will shift from memory to dim (low beam) mode. With a second press, the light will shift to max bright (high beam) mode. The light will continue to cycle between modes.

So never be blinded again in the cockpit by a flashlight that is too bright. Enjoy maximum brightness when you need it at the touch of a button.
