

# Coolspool 29 Twin

## Opis produktu

Two powerful 28V DC aircraft start units connected in parallel to double the turbine starting capacity for larger twin turbine aircraft and helicopters where additional amp/hour capacity is required to maintain voltage under load.

- 4800 peak amps
  - Sealed lead acid AGM batteries
  - Cleared for air transportation
  - Internal charger with LED status
- 
- Aluminium case with carry handle
  - Solid state voltmeter
  - Auxiliary/accessory socket
  - Available in 26V or 28V DC versions

Size and weight are important considerations for hand-portable aircraft start units. Situations exist where additional battery capacity and performance is required while retaining the essential benefits of mobility or 'hand-portability'. The solution, pioneered by Powervamp more than 20 years ago and now adopted throughout the industry, is to connect two units in parallel to create the Coolspool 29 Twin.
