# Flyer-Truck FLT Heli loader 3600

## Opis produktu

Adapted for helicopter with skid up to **3.6 t.** max. take off weight - for example:

- Eurocopter AS350, EC120, EC130, EC135, EC145, BK117
- Bell B206B, B206L, B407
- Agusta A119

<b>Drive system</b>	Electric engine with differential axis, 24 V 1.2 kW  Two drive wheels, high traction because the center of weight is introduced near of the drive axle pulse control
<b>Battery</b>	4 x 12 V 135 AH plumb-acid battery
<b>Battery charger</b>	Integrated HF charger 230/24V 18A with charge level indicator and battery sustainment function
<b>Brake</b>	Spring power brake magnetic 16 Nm/24V
<b>Speed</b>	forward and backward:  step 1: approx. 0 – 3 km/h  step 2: approx. 0 – 6 km/h
<b>Frames</b>	for helicopter till approx 3.600 kg, 8.000 lbs  dimensions: 5.99 m length x 1.36 m width
<b>Steering</b>	Mechanical steering:  Heavy duty double joint wheels,  single load till 2000 kg, 360° rotatable.  Steering over a steering handle
<b>Helicopter adapter / hydraulically lifting system</b>	Parallel mounting frame with four hydraulic cylinders.  Level compensation through individually controllable lifting and lowering for a need-based position of the helicopter.  Side stability through continuous and telescoping transverse frames, screenless linear adjustment.  Universally adjustable transverse frames and adapter for helicopter docking. Freely adjustable, rolls guided and quick-clamping or quick-lifting device. Skids guide with plastic
